Reasons for allowance

1. The application of Lindgren et al. for the "Methods for changing the bandwidth of a circuit switched channel" filed 06/15/2001 has been examined. This application is a national stage entry of PCT/SE99/01573 International Filing Date: 09/09/1999. This application claims foreign priority based on the application 9803068 filed September 10, 1998 in Sweden. Receipt is acknowledged of papers submitted under 35 U.S.C 119(a) – (d), which papers have been placed of record in the file.
2. Claims 1-34 are allowable.
3. The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a no obvious improvement over the prior art of record. The improvement comprises: a method for increasing bandwidth of a circuit switched channel in a TDM network, the channel comprising a set of time slots within each recurring frame of a bitstream of the network, the method comprising the steps of: reserving for the channel, one or more additional time slots within each recurring frame of the bitstream, including using, during a period of time, only the set of time slots for transmitting payload data pertaining to the channel while providing, during the period of time, information indicating that the one or more additional time slots are currently not used for transferring payload data and using, after the period of time, the set of time slots as well as the one or more additional time slots on the bitstream for transmitting payload data pertaining to the channel; a method of decreasing bandwidth of a

circuit switched channel in a TDM network, the channel comprising a set of time slots within each recurring frame of a bitstream of the network, the method comprising the steps of using, during a period of time, only a portion of the set of time slots for transmitting payload data pertaining to the channel while providing, during the period of time, information indicating that the remaining time slots of the set of time slots are currently not used for transferring payload data, and deallocating, after the period of time, the remaining time slots from the channel while continuing using the portion of set of time slots for transmitting payload data pertaining to the channel, as expressly recited in the claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The Bohm et al. (US#6,430,180) is cited to show the method and apparatus for switching data between bitstreams of a TDM network.

The Lindgren et al. (US#6,157,656) is cited to show the method and arrangement for dynamic signaling.

Art Unit: 2665

The Antal et al. (US#6,587,472) is cited to show the fair channel allocation protocol for DTM networks.

The Lindgren et al. (US#2002/0126687) is cited to show bitsream management.

The Lindgren et al. (US#2002/0126688) is cited to show bitsream management.

The Ramfelt (US#5,838,687) is cited to show the slot reuse method and arrangement.

The Gauffin et al. (US#5,517,499) is cited to show the method and an arrangement for synchronizing two or more communication networks of the time multiplex type.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Man U. Phan whose telephone number is (571) 272-3149. The examiner can normally be reached Monday through Friday from 6:00 am to 3:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy Vu, can be reached on (571) 272-3155. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306/9314.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.
